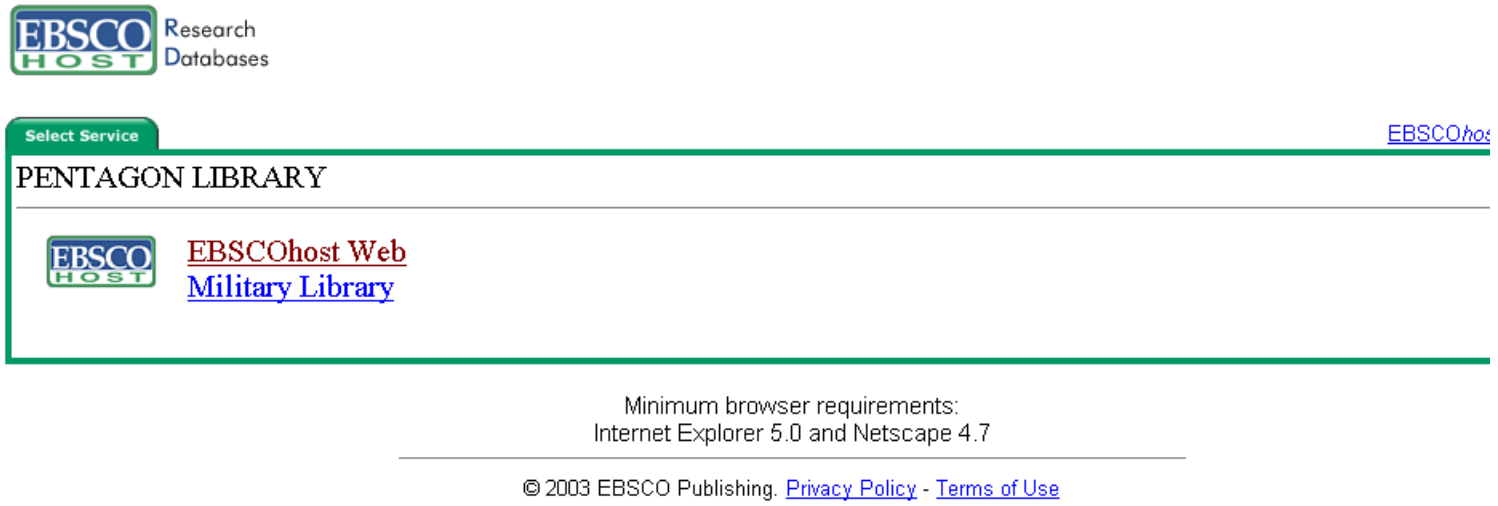
EBSCO Host Tutorial

Pentagon Library
November 2003

EBSCO Host is a bibliographic reference system, which allow you to search subject-specific databases and have the full text articles in one stop. To access EBSCO Host, go to library website at http://www.hqda.army.mil/databases.htm, following letter E.



After you connect to EBSCO Host, the system automatically leads you to a **Choose Database** screen. Currently we subscribe to four databases from EBSCO. The brief description of each database is displayed below the name. The **More Information** link below the briefing will provide database details including search tips. The **Title List** next to the **More Information** tells you the availability of journal titles from this database along with format of content and a period of coverage.

More Information

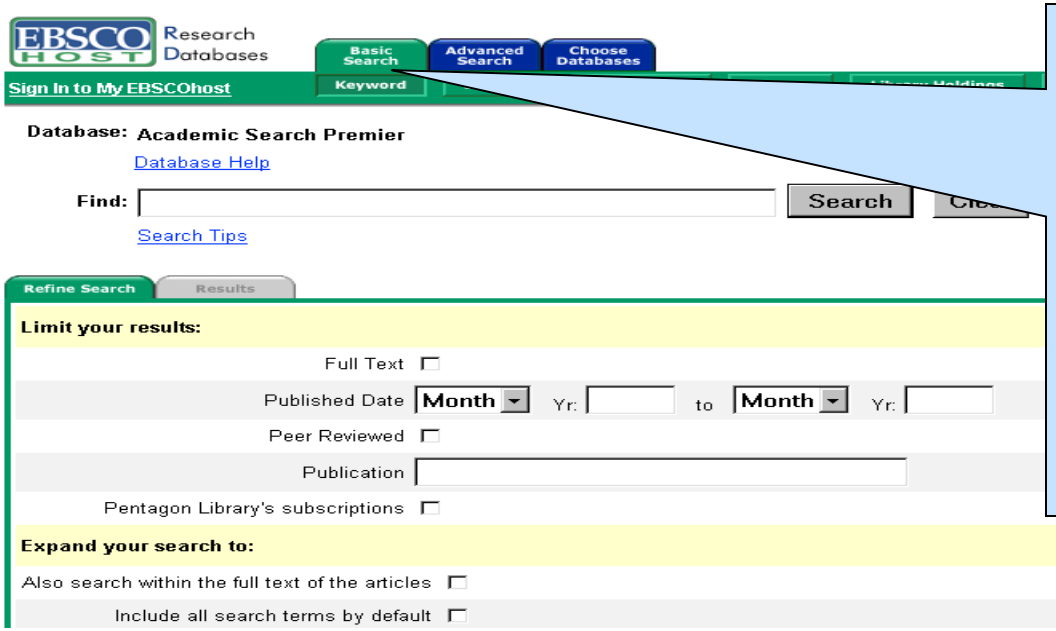
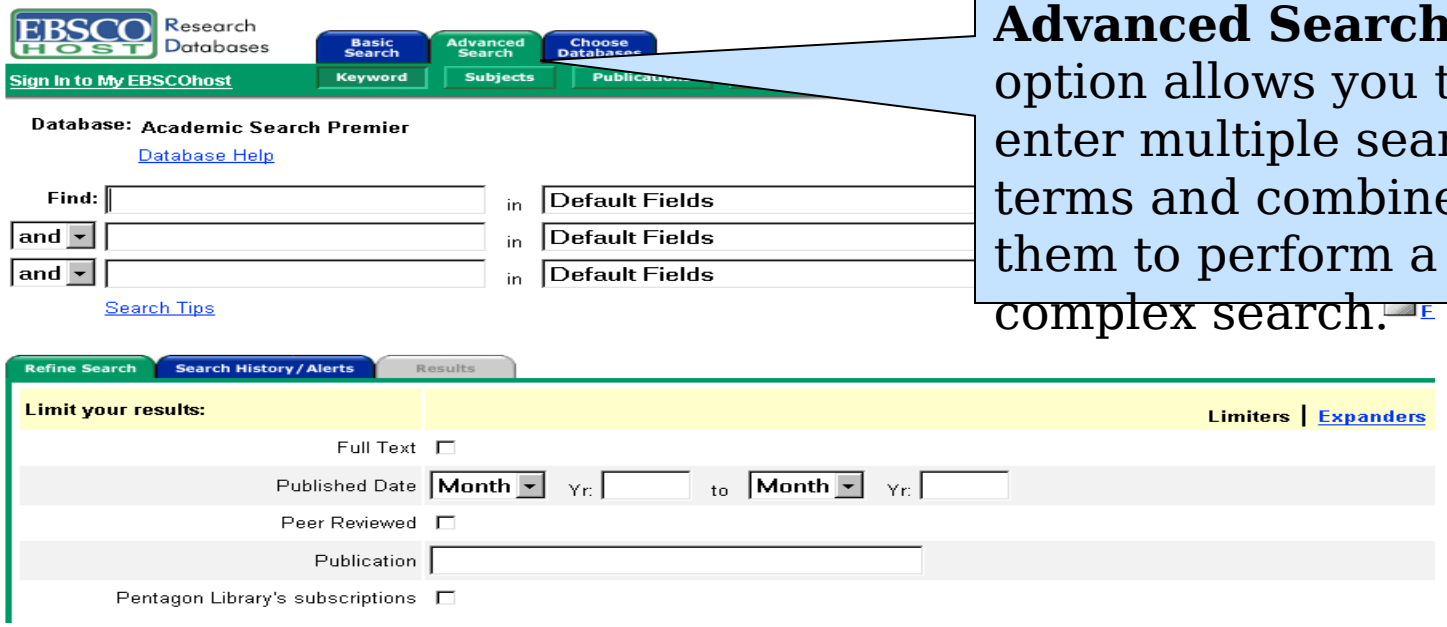
To select the database, check the box in front. You can select and search more than one database simultaneously. If you wish to select only one database, simply click on a database name link. Then click **Continue**.



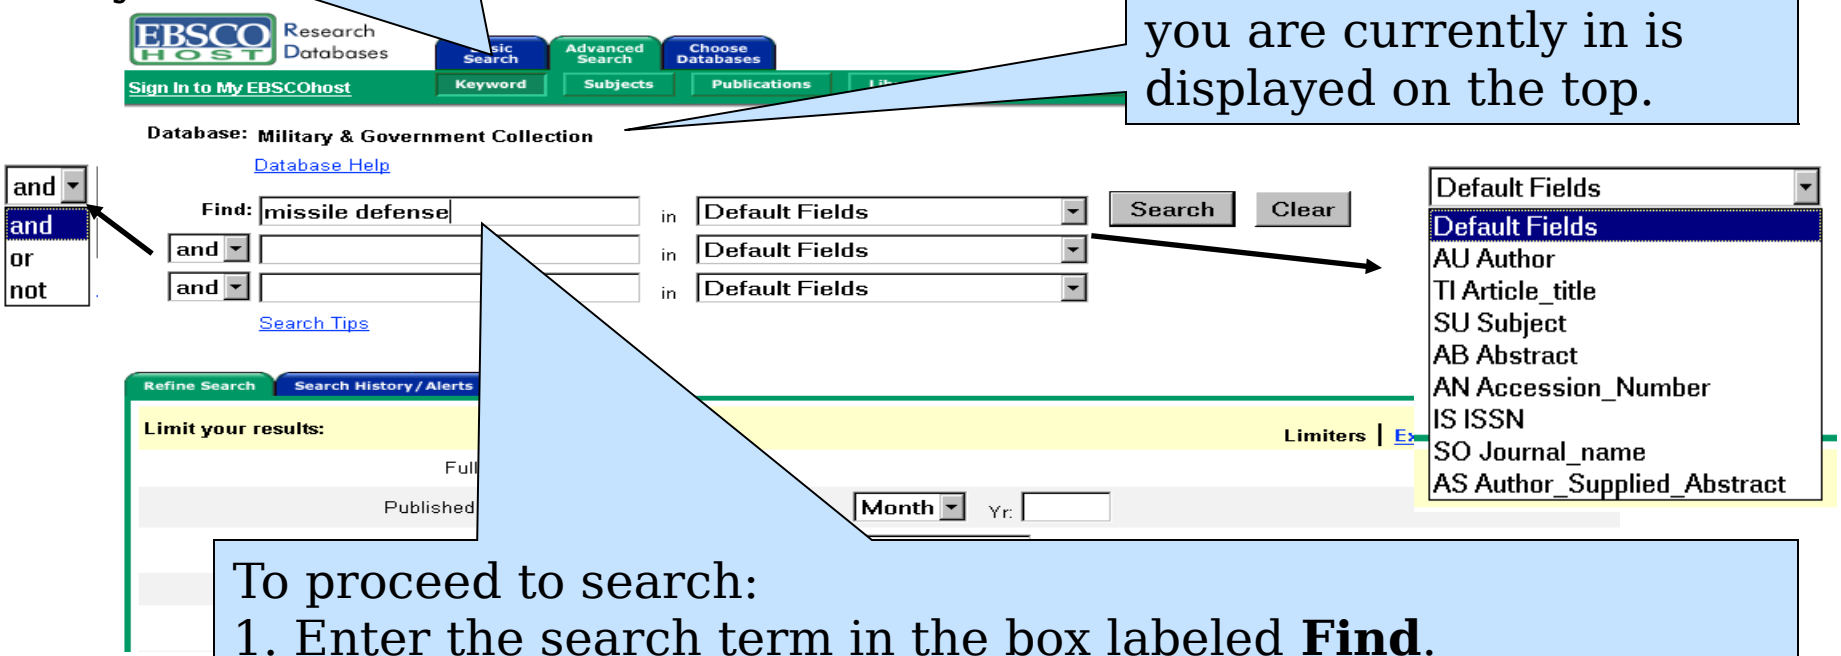
There are two search options available from EBSCO Host. The **Basic Search** window lets you create a search by entering terms in the find field and then selecting from these search modes: standard, all words, any words, or exact phrase.



Advanced Search option allows you to enter multiple search terms and combine them to perform a complex search.

After choosing the database from the last step, you are automatically lead to the **Keyword** search screen.

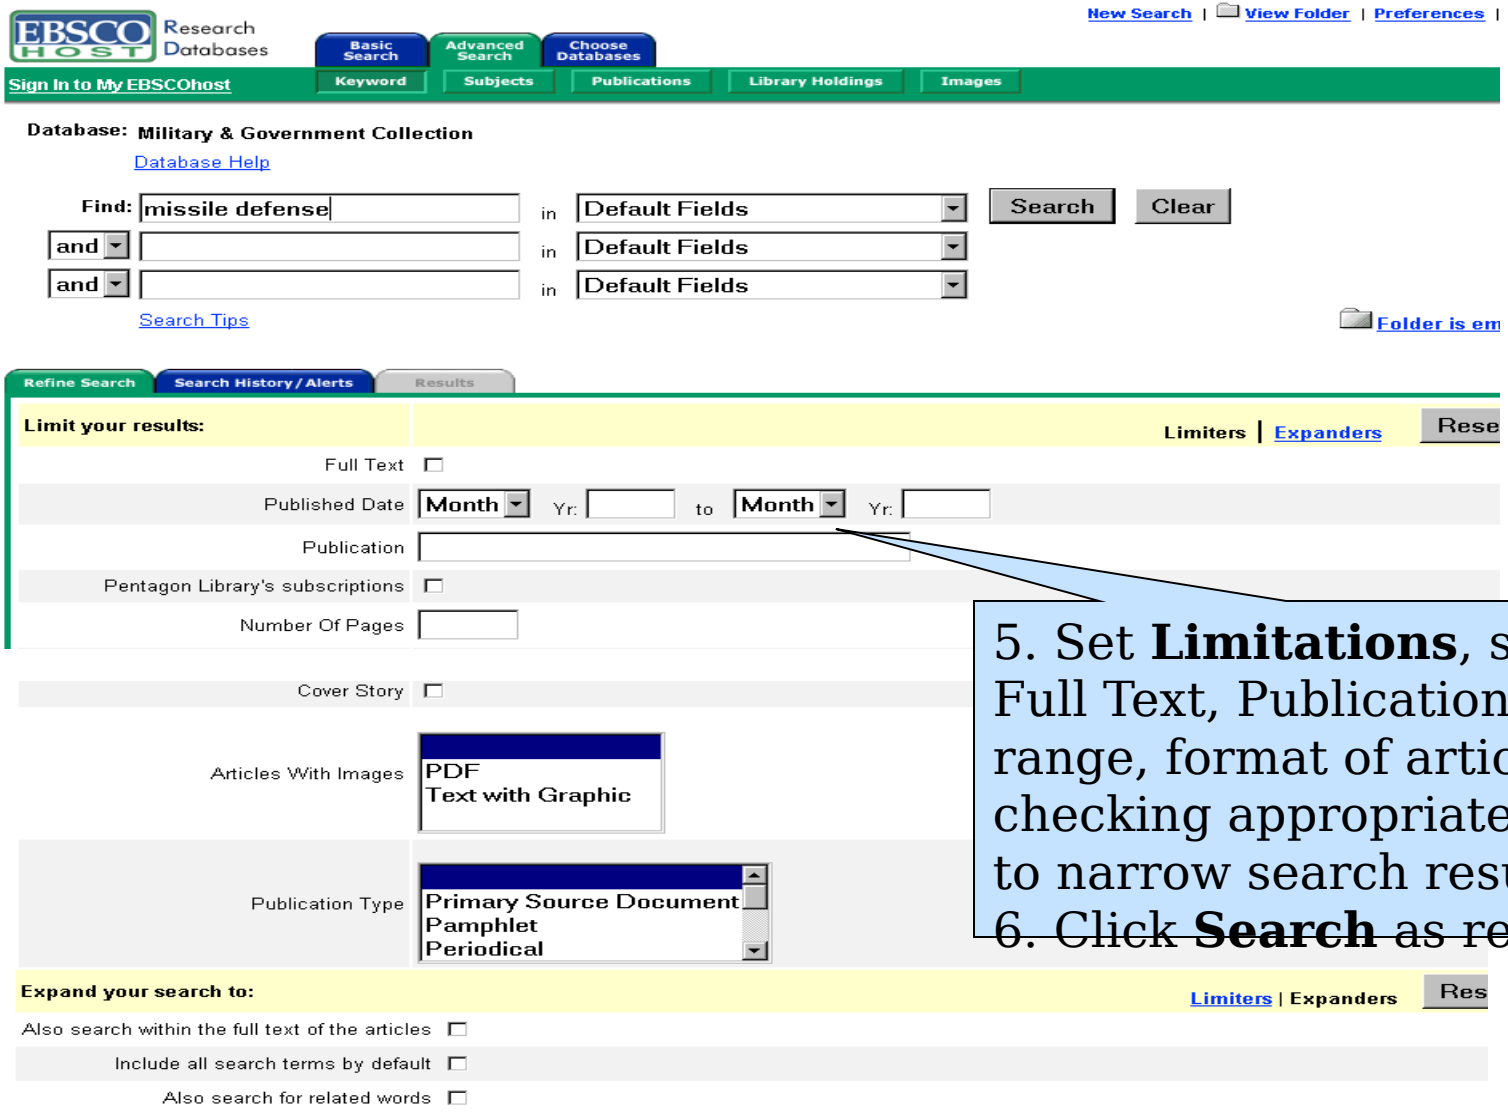
The name of database you are currently in is displayed on the top.



To proceed to search:

1. Enter the search term in the box labeled **Find**.
2. Choose a search field from the dropdown box next to the term your entered.
3. Enter additional terms in the optional text boxes if you are in Advanced Search option.
4. Select Boolean Operators (and, or, not) to connect the terms entered.

* The relationship among the Boolean Operators is on the back of tutorial.



5. Set **Limitations**, such as Full Text, Publication Date range, format of articles by checking appropriate boxes, to narrow search results.
6. Click **Search** as ready.

If you are not satisfied with the search results, click **Refine Search** to modify your current search terms and settings.

On the results screen, the full text icon will be shown below the article title if it is available online. To access, click it. Or click on the title to have more delivery options.

If it is not available online, but is available from our library collection, it will be indicated as **held locally**. You can come to the library to make a copy.
